

Anti-EHV-1 GP2 Polyclonal Antibody

Category: Polyclonal Antibody

Catalog#: AB1G101

Species Reactivity: Equid herpesvirus 1 strain: Racl11, USA

Immunogen/Specificity:

Polyclonal antibody produced in rabbits immunizing with a synthetic peptide corresponding to middle residues of Wild-type equine herpesvirus 1 (EHV-1) glycoprotein, gp2

Description: Wild-type equine herpesvirus 1 (EHV-1) strains express a large (250-kDa) glycoprotein, gp2, that is encoded by EUs4 (gene 71) located within the unique short region of the genome. The expression of full-length gp2 restore full respiratory virulence to the attenuated strain.
