

Cell Signaling Human AKT1 (PKB)

Molecular Mass: 56 kDa

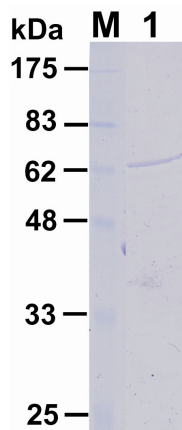

Catalog#ANT-48

Size:10µg

Price: \$250

Description:

AKT1 (v-akt murine thymoma viral oncogene homolog 1), also known as PKB (protein kinase B), is a serine/threonine kinase. Recombinant protein was purified from E. coli.

Purified human AKT1. The protein (100 ng) was analyzed by electrophoresis on a 10% SDS-polyacrylamide gel and visualized by staining with Coomassie blue. Protein size markers (lane M) are indicated on the left
