

## Cell Signaling Human AKT1 (PKB)

**Molecular Mass:** 56 kDa

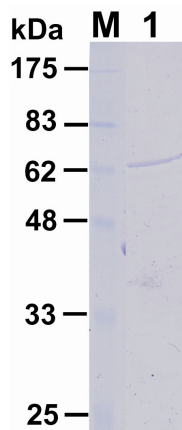

**Catalog#**ANT-48

**Size:**10µg

**Price:** \$250

### Description:

AKT1 (v-akt murine thymoma viral oncogene homolog 1), also known as PKB (protein kinase B), is a serine/threonine kinase. Recombinant protein was purified from E. coli.

**Purified human AKT1.** The protein (100 ng) was analyzed by electrophoresis on a 10% SDS-polyacrylamide gel and visualized by staining with Coomassie blue. Protein size markers (lane M) are indicated on the left

**For research use only**
