

Rabbit anti-human serum albumin (HSA)

Cat. #: P0001

Description:

Affinity purified rabbit anti-HSA antibodies are developed from using purified human serum albumin as immunogen. The antibodies are useful for detection, identification, quantitation and isolation of human serum albumin.

Immunogen/Specificity:

pure human serum albumin.

Human serum albumin, do not cross-react with bovine serum albumin.

Purification:

affinity purified with HSA immobilized on agarose and adsorbed with bovine serum albumin.

Method of Conjugation:

acylation of primary amine with active ester of biotin (NHS-activated d-biotin).

Applications :

ELISA, westernblot, and immunoprecipitation.

Formulation

5 mg/mL in TBS (pH7.2) with 0.1% NaN₃.

Clone Number:

Isotype:

Species: Human

Storage and Stability :at -20oC, stable for up to 3 three years.
